Scrum & Agile Methodologies

Profile

Senior Software Engineer and Certified OutSystems Architecture Specialist and web developer with 8+ years of experience delivering secure, scalable and maintainable enterprise systems for government and defense sectors in Saudi Arabia. Over 2.5 years of hands-on experience designing and leading OutSystems Reactive web applications, with a strong focus on workflow-driven systems and approval processes, integrations and modular enterprise architecture using the 4-Layer Canvas to proactively prevent technical debts by design and executing end-to-end SDLC. Solid foundation in C#, ASP.NET Core, SQL Server, and Clean Architecture principles, offering the flexibility to architect and deliver enterprise-grade solutions across both low-code and traditional platforms.

Education

Bachelor's degree, Computer Software Engineering
King Saud University

Jan 2011 - Dec 2017

Experience

Full-Stack web developer

Feb 2019 - Present

SAMI Advanced Electronics, Al-Riyadh Governorate, Saudi Arabia

Worked across both .NET and OutSystems environments to deliver high-impact government and enterprise solutions.

Leveraged OutSystems for rapid project delivery while continuing to lead large-scale .NET-based systems While ensuring long-term scalability and maintainability.

Currently Working on developpeing a comprehensive Request & Approval Management System (.NET 8 MVC, Razor, Metronic) — featuring intuitive UX design, a custom multi-step approval workflow, configurable approval chains, dynamic request forms, versioned attachments, real-dashboards and alerting users through emails and notifications. This system was developed Solely.

Highlights:

- Current: Request & Approval System (.NET 8 MVC, Razor, Metronic, Metronic Theme)
- Past: Delivered 7 government projects using Razor, MVC, and WebForms.
- Outsystems: Led a team in delivering 3 RSAF (Royal Saudi Air Force) projects using OutSystems Reactive Web developing secure operational system with advanced business logic, validations, role-based access control, and REST/SOAP integrations.
- Optimized performance by replacing slow aggregates with Advanced SQL, built a secure exam system with randomized questions and automated grading.

Stakeholder Management: Collaborated directly with project stakeholders and product owners to gather business requirements and translate them into detailed technical specifications then implementing the full-stack logic for projects

Languages
